

Personal Safety Monitoring for Home Care Workers

Mason Mobile Worker Safety Solutions

Protect Your Frontline Employees

Nearly 70% of home care organizations have experienced safety incidents, with over 20% described as “very severe.” Mason's A4100 smartwatch offers essential technology to mitigate these risks for mobile and remote workers.

Key Features

Discreet Wearable

The Mason A4100 smartwatch is worn on the wrist or via a lanyard/garment clip, ensuring it's always accessible without being intrusive.

Automatic Recording

Equipped with the world's first front-facing camera on a wearable, it automatically records activities and allows real-time communication.

Safety Alerts

Our platform triggers alarms to your monitoring center if the panic button is pressed or fall detection is activated.

GPS Tracking

Location-based alerts through our API or alert platforms notify you of unexpected locations, facilitating easy tracking.

Custom Rules

Set custom rules for continuous monitoring, such as alerts when a device goes offline unexpectedly.
